

Micro-renewable Energy Seminars

Microgeneration Certification Scheme:

All you need to know.

An evening seminar outlining the route to becoming accredited through the Microgeneration Certification Scheme and the benefits this can bring.

Inverness College

Lecture Room G20

19:00 Start

Followed by Tea, Coffee and networking

Wednesday 23rd June

Microgeneration Certification Scheme: All you need to know

Wednesday 21st July

Funding for micro-renewables: Grants, FITs and the RHI

Wednesday 18th August

Retrofitting of renewable energy technologies

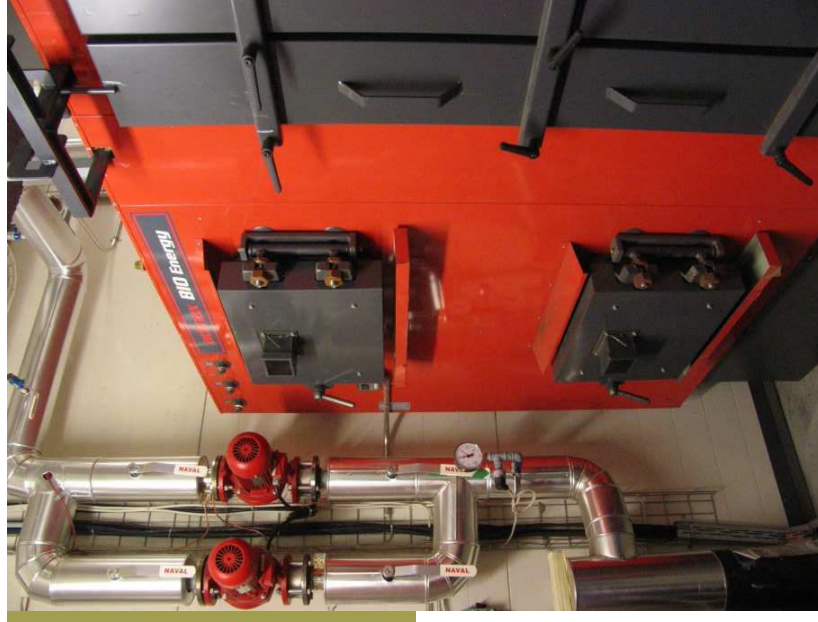

Wednesday 15th September

Overview of RHI applicable technologies

The Sustainable Energy And Micro-Renewables Centre at Inverness College and Use Green Heat, a project run by Highland Birchwoods, are joining forces to put on a series of FREE evening seminars on aspects of micro-renewable energy and sustainable construction methods. This is your chance to learn about specific topics relating to micro-renewables, and to network with others in the industry.

The first event aims to take you through the MCS process, and is a great opportunity to talk to the assessors and installers that have been through the assessment scheme.
